

Steel Semi-Automatic Stretch Wrap Machine 50 In. Turntable Diameter 4,000 Lb. Capacity Blue / Yellow

MODEL SWA-50

Packaging Equipment / Powered Stretch Wrap Machines

PRODUCT OVERVIEW

The semi-automatic stretch wrap machine design offers bigger carousel sizes with carousel rotation that is controlled by a foot switch. The power input has variable AC motor that allows adjustable deck speed and includes soft-start/stop. The film-wrap tension is controlled with an adjustable, friction-brake assembly. Film placement is controlled manually by moving the carriage assembly up and down on the vertical mast. An easy-to-release, hand operated carriage-brake allows the carriage to move freely making film application fast and simple. The system will accept 10 (in.) to 20 (in.) material. The unit ships with mast disconnected—simply raise mast and clamp into place.

KEY FEATURES

- Stretch wrap design increases shipping productivity
